

**LET CUSTOMERS PAY
AT THEIR TABLE!**

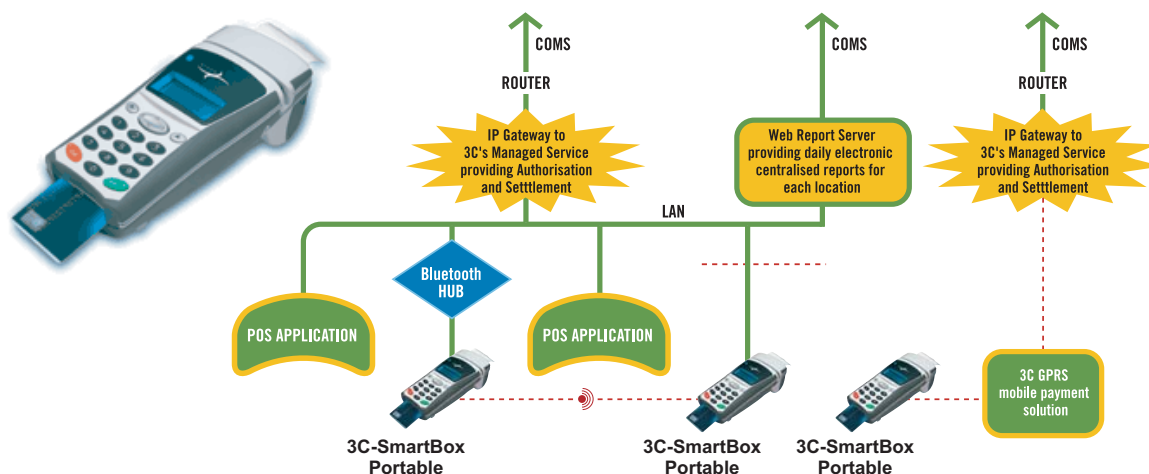

3C-SmartBox Portable

The new all-in-one credit card payment solution

3C-SmartBox is a solution based on the concept of using standard software running on the till and PIN pad. Transactions are sent to the 3C payment system for authorisation and settlement – which has already received bank certification – run by 3C's Managed Services department. Daily management reports are produced and merchants can view their reports securely over 3C's Web Report Server tool.

The **3C-SmartBox Portable** terminal is a Chip and PIN ready wireless payment terminal supporting integration with POS systems. Designed for use primarily in hospitality environments, although providing an excellent solution for many retail environments, the **3C-SmartBox Portable** Bluetooth® terminal features functionality for "pay at table" environments including split tender, gratuity and bill selection functions. Using secure Class 1 Bluetooth® technology and interfacing with the major banks through 3C's payment gateway. The **3C-SmartBox Portable** is the complete solution for wireless card payment acceptance.

Features and Benefits:

- **3C-SmartBox** is pre-accredited; so with a bare minimum of configuration and testing, the new system can be up and running within weeks rather than months.
- Integration with the POS provides single key entry, fast transaction times and consolidated management reporting, without any need for extensive investment in staff, training and equipment.
- **3C-SmartBox** is fully compliant with the EMV Chip and PIN specifications, ensuring that retailers will be insulated from the effects of the liability shift and protected from rising fraud levels.
- **3C-SmartBox** retailers can now take advantage of **Dynamic Currency Conversion (DCC)** and **Tax Free** shopping integrated into the terminals. Providing an incremental revenue stream for your business.
- No double keying of data and centralised managed information - are managed by 3C-SmartBox.
- Mid-tier retailers who adopt this plug & play solution can expect to save thousands of pounds and months of effort. Start-up and running costs are greatly reduced.
- Merchants receive a complete Chip and PIN packaged solution consisting of a robust, secure, counter-mounted pinpad, the same authorisation software relied upon by thousands of customers and the benefits of a professionally managed transaction processing service.
- Merchants have the choice of leasing the system for a competitive, fixed monthly fee, providing predictable budgeting.
